

Vatsal S. Doshi, MD, MPH is a Board Certified Ophthalmologist and fellowship trained Vitreoretinal Specialist. He received his Doctor of Medicine degree from Harvard Medical School, where he graduated with High Honors. During his medical studies, he also pursued an interest in public health, obtaining a Masters in Public Health from the Harvard School of Public Health. Subsequently, he was accepted for Ophthalmology residency training at University of Southern California, Doheny Eye Institute—one of the top 10 eye institutes in the U.S., and a leading academic center for retina research. Along with obtaining superb clinical and surgical training, he was involved in numerous projects including work in microincisional retinal surgery, and was recognized for his research by the Los Angeles Eye Society Nesburn Award.

Dr. Doshi then completed a two year fellowship in medical and surgical retinal diseases at the New York Eye & Ear Infirmary—the nation’s oldest and busiest eye hospitals and a premier institution for vitreoretinal training in the tri-state area. In addition to providing the latest treatments for medical retinal diseases, he performed numerous surgeries, including some of the most complex cases in the region, for diabetic retinopathy, retinal detachment, trauma, macular hole, and a variety other retinal disorders. He continues to serve as clinical faculty at New York Eye & Ear Infirmary where he is actively involved in teaching residents and fellows in the management of retinal diseases.

Dr. Doshi has special interests in macular degeneration, diabetic retinopathy, and international Ophthalmology, and he has numerous peer-reviewed publications in prestigious journals such as *Ophthalmology*. He has received several awards during his career, including a research award from the National Eye Institute. He has lectured and presented at local and national meetings. Dr. Doshi prides himself on combining excellence throughout his career with a patient-centered approach to delivering retinal care, where treatment decisions are individualized in order to achieve the best vision outcomes. Dr. Doshi is grateful to all his patients who have given him the ability and the opportunity to restore vision, improve lives, and make a difference.
